

# ComfortNet™ Communicating Control System

*For Residential and Light Commercial Applications*

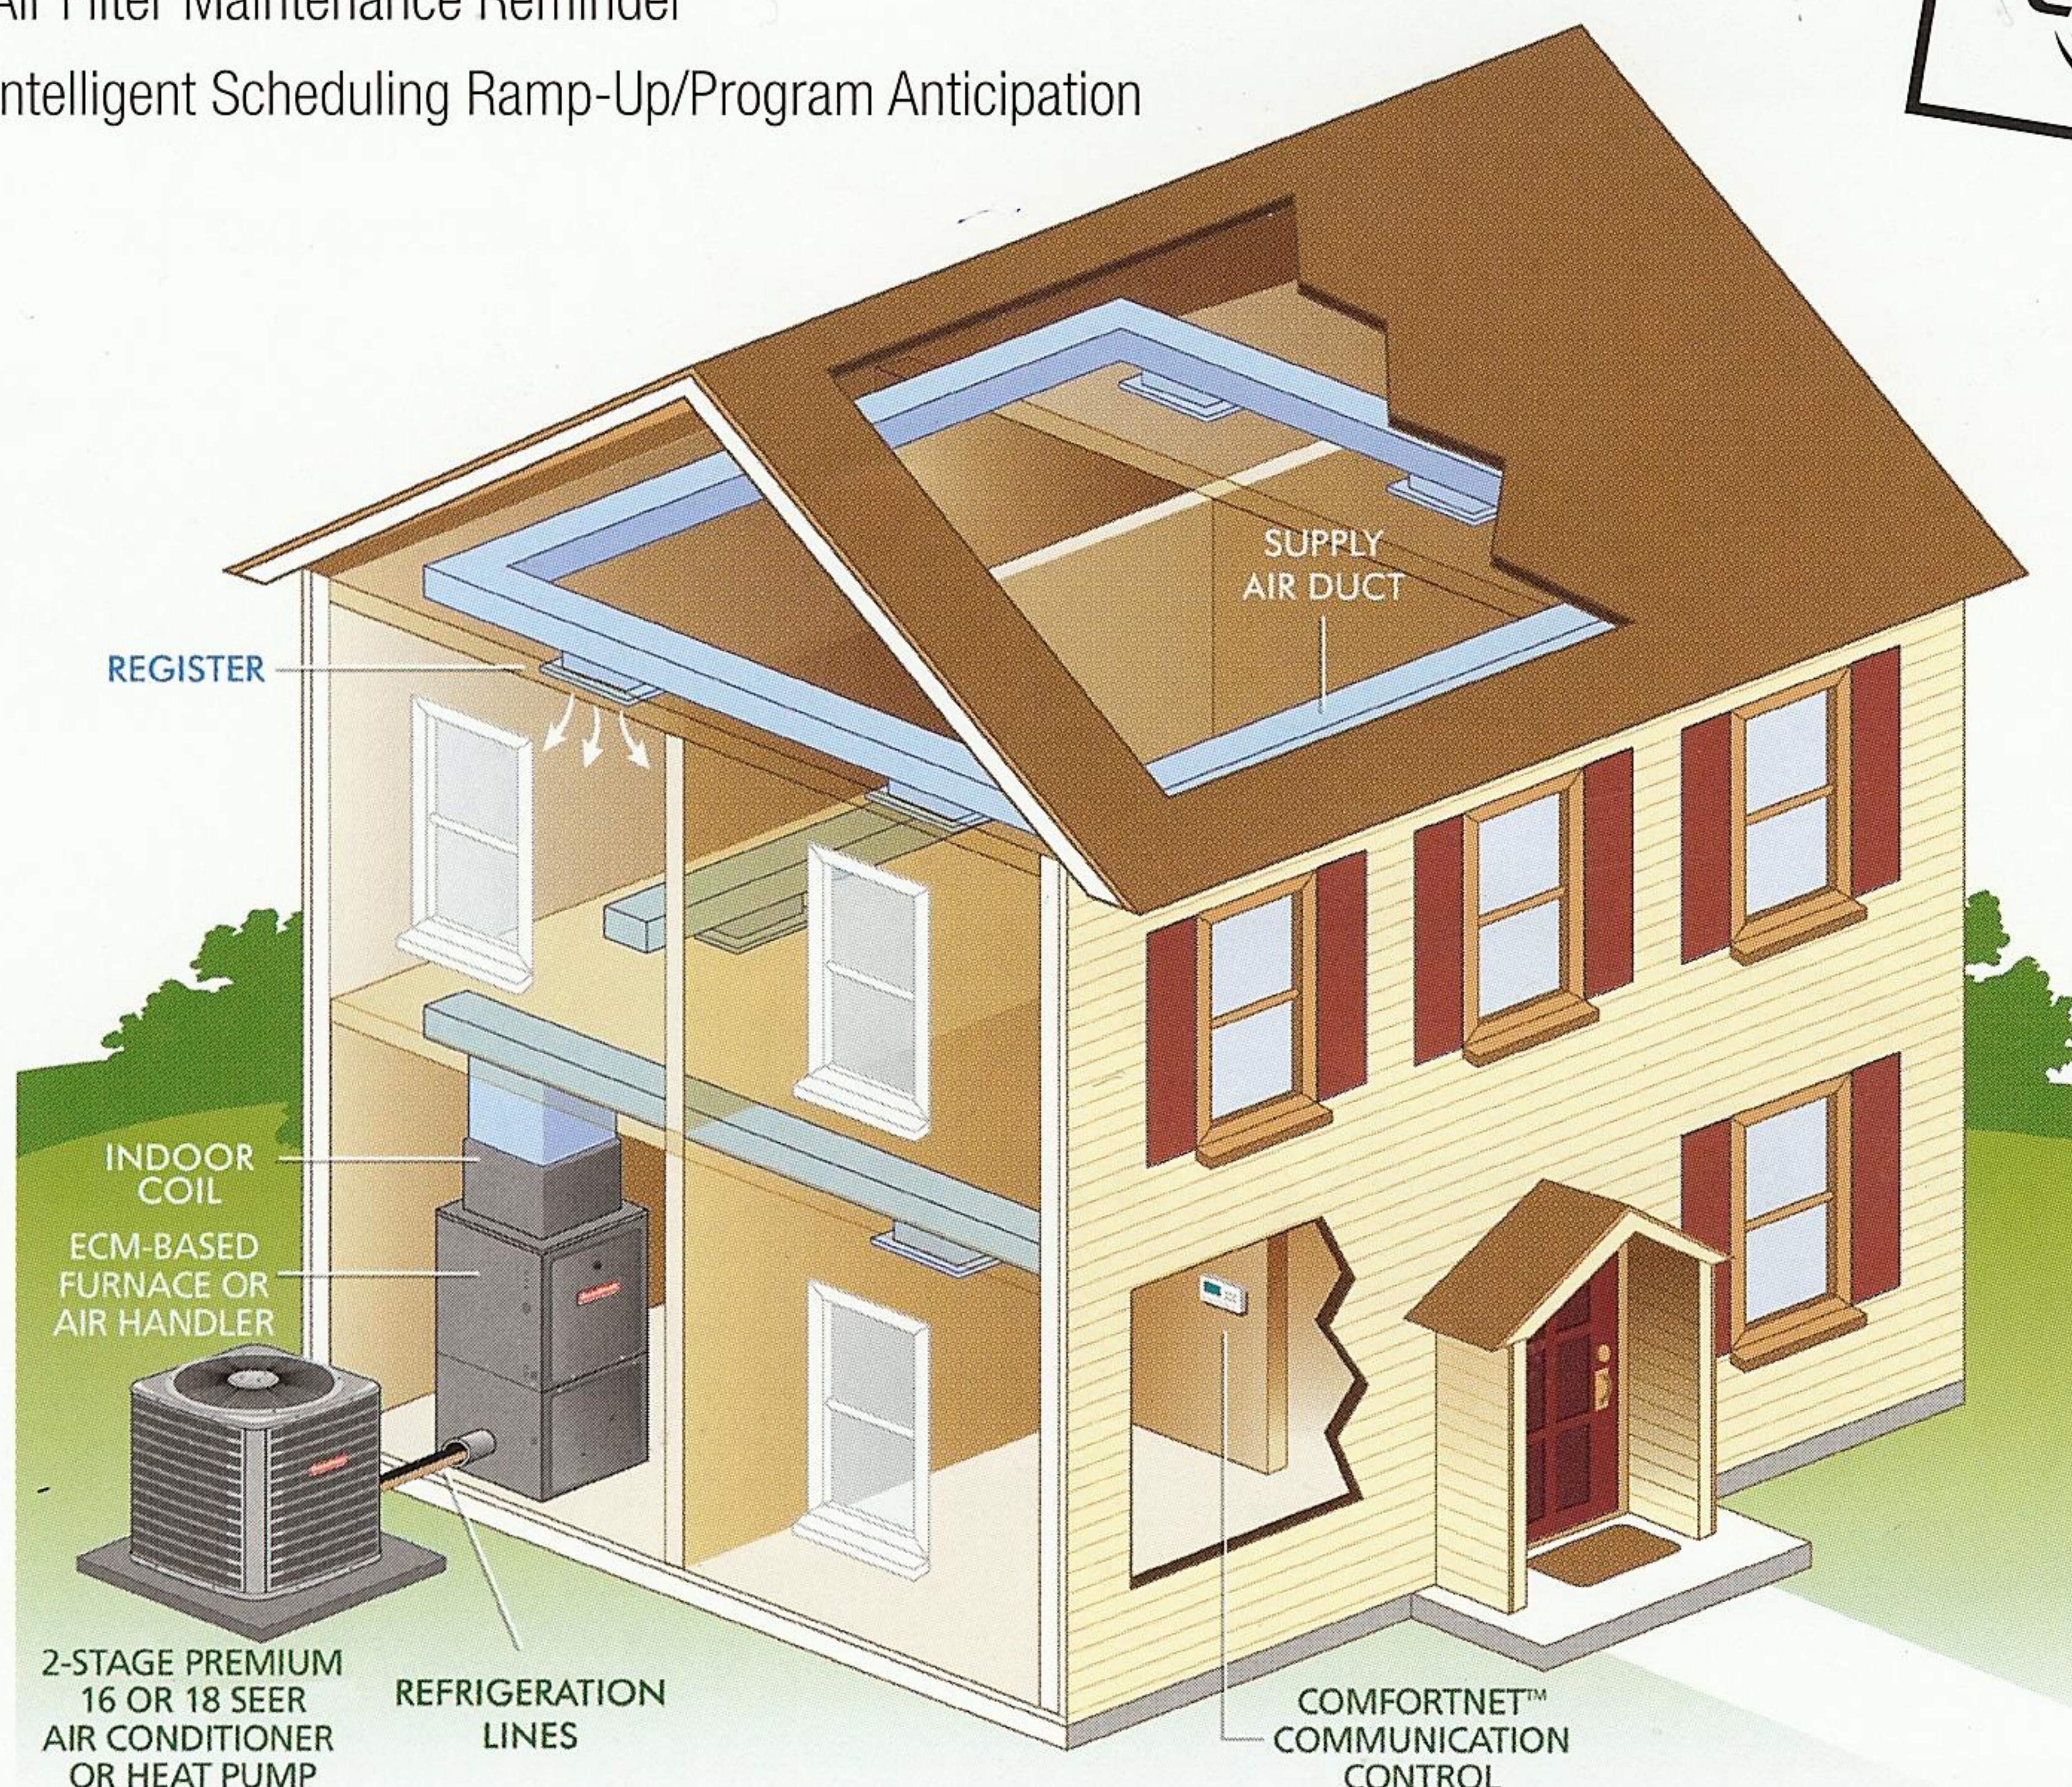

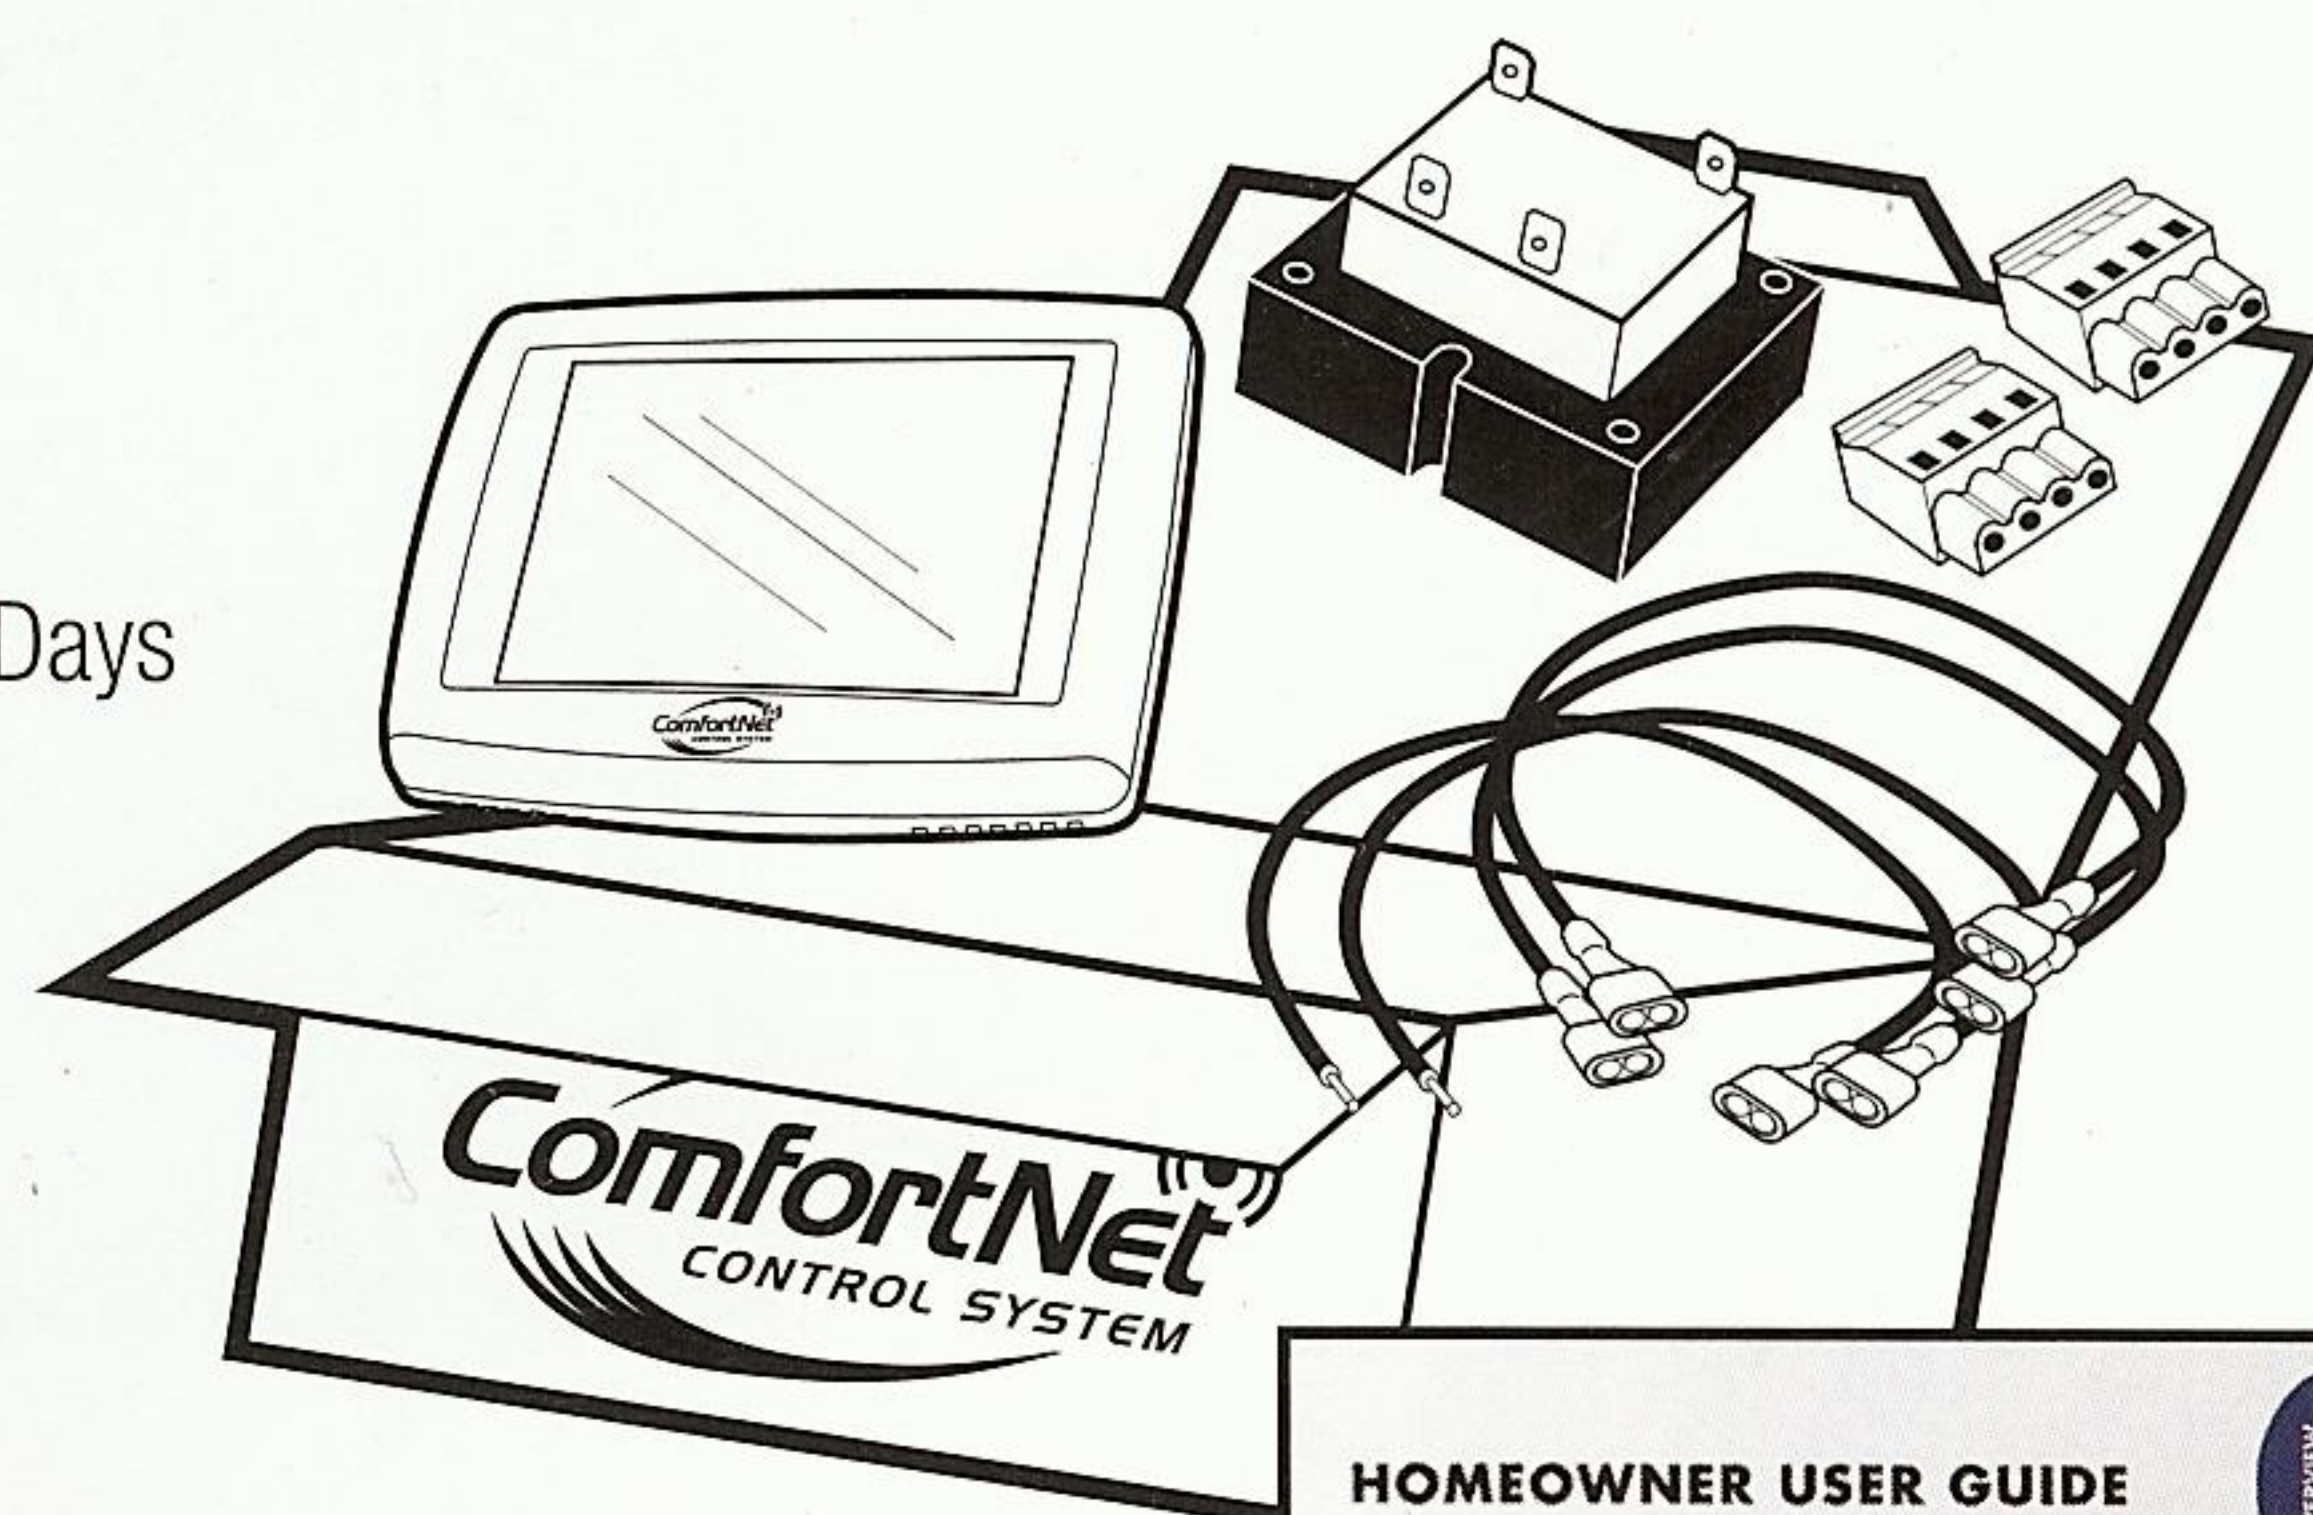

The ComfortNet™ Communicating Control System continuously monitors itself for optimum performance. If it senses a problem developing, the touchscreen control Home Screen Display will indicate “Call for Service” and **CHECK (Equipment Name)** in the scrolling message area to identify an equipment fault. This prompts the end user to contact a qualified service technician.

The ComfortNet Communicating Control System works with Goodman® and Amana® brand HVAC products and systems. Look for the ComfortNet Compatible identification.

## Product Features
